ENGS 108 Fall 2018 Assignment 2b
Due October 3, 2018
Instructors: George Cybenko

This is the second part of Assignment 2.

Problem 5.

- Read the files in the Cyrillic dataset and create two arrays, the measurements (called "meas") and the class (numbered 1 through 34).

- The array row i is $meas(i,:)$ and is labelled as $class(i)$.

- You can read them into a Matlab or Python array.

- Show your code.
